Examiner's Comment and Reasons for Allowance

This action is responsive to Request for Continued Examination (RCE) filed June 29, 2006. Claims 19-36 have been amended. Claims 19-36 were pending. Claims 19-36 are now allowed.

Priority

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Israel on May 23, 2001. It is noted, however, that applicant has not filed a certified copy of the PCT/IL01/00471 application as required by 35 U.S.C. 119(b).

Oath/Declaration

Applicant is now required to submit a substitute declaration or oath to correct the deficiencies set forth in the Office Action mailed February 6, 2006. The substitute oath or declaration must be filed within the THREE MONTH shortened statutory period set for reply in the "Notice of Allowability" (PTO-37). Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136. Failure to timely file the substitute declaration (or oath) will result in ABANDONMENT of the application. The transmittal letter accompanying the declaration (or oath) should indicate the date of the "Notice of Allowance" (PTOL-85) and the application number in the upper right hand corner.

Additionally, in the remarks submitted June 6, 2006 the Applicant argues "*that there are no deficiencies or inaccuracies present in the declaration filed on April 11, 2002 (a copy of which is attached hereto)* by applicant's prior representatives. As is clearly shown, all of the inventors have signed this declaration." The Examiner respectfully disagrees. The submitted "copy" of the declaration is not a copy of the declaration filed January 23, 2002 and contains many notable differences. First of all, the date of the signatures of all the

inventors is January 30, 2002 differs from the date of the filing of the original declaration, which is January 23, 2002. Secondly, the original declaration filed January 23, 2002 referenced PCT/IL/01/00471 which has been omitted from the “ copy” . For at least these above reasons, the “ copy” that was submitted as evidence of a proper declaration is inaccurate. The declaration remains deficient and therefore a supplemental declaration in compliance with 37 CFR 1.67 is required.

Reasons for Allowance

- The following is an examiner’ s statement of reasons for allowance:

None of the prior art, either singly or in combination, teach a method of tracking a network communication line by a first terminal simulating original browser activity of a second terminal, the method comprising: accessing the network communication line, tracing TCP/IP data packets routed through the network communication line, selecting TCP/IP data packets relating to an IP address as identified data packets, selecting from the identified data packets current requests for new connections as original requests, selecting from the identified data packets current web page components indicating new addresses as new navigation components, organizing the new navigation components into at least a false new components category comprising at least embedded objects or frames and a true new components category comprising at least hyperlinks, organizing the original requests into at least a primary request category comprising original requests matching those in the true new components category or original requests failing to match any of those in the true new components cater and belonging to HTTP or POST type and a secondary request category comprising original requests matching those in the false new components category or original requests failing to match any of those in the false new category and not belonging

to HTTP or POST type, selecting, from the identified data packets, HTML data files relating to primary requests as respective primary responses, generating virtual secondary requests according to the respective secondary responses, selecting respective secondary responses from the identified data packet responses relating to secondary virtual requests, and simulating web page presentation on the first terminal agent according to the respective secondary responses as claimed in independent claims 19 and 29.

- Claims 20–28 and 30–36 depend on claims 19 and 29 respectively, therefore are allowed for similar reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
